SUMMARY

Computer Science and Engineering (IoT) student focused on Software Engineering and Full-Stack Development, with hands-on experience in Java, Python, SQL, MySQL, and Spring Boot. Experienced in building practical applications through academic, internship, and personal projects, with a strong interest in developing reliable, user-focused software solutions. Currently strengthening Data Structures & Algorithms, database fundamentals, and problem-solving skills. Seeking an entry-level Software Engineer opportunity to apply my skills and grow through real-world projects.

SKILLS

Programming Languages:

Java, Python, HTML, CSS, JavaScript

Frameworks & Technologies:

VS Code, Git, GitHub, Spring Boot, Power BI, Tableau

Core Concepts:

Data Structures & Algorithms, Object-Oriented Programming (OOP), REST APIs, SQL

Soft Skills:

Problem Solving, Creative Thinking, Fast Learning, Teaching, Collaboration

EXPERIENCE

Software Development Intern

Full-Stack Travel Management System

- Developed a responsive travel management web application using HTML, CSS, JavaScript, and Spring Boot.
- Implemented secure user authentication and role-based access for users and administrators.
- Added destination bookmarking, trip booking, and trip cost estimation features.
- Developed an administrator dashboard for managing users, bookings, and destination information.
- Worked with Spring Boot, REST APIs, and database integration while gaining practical experience in full-stack application development.

PROJECTS

SafeShadow – Women Safety Android Application

- Designed and developed an Android application to improve women's safety during emergency situations.
- Implemented automatic emergency detection using phone shake, running detection, and fall detection.
- Integrated SMS-based emergency alerts supporting up to five emergency contacts.
- Added an SOS feature for instant emergency communication.
- Implemented confirmation notifications before sending alerts to reduce false emergency triggers.
- Included customizable settings for emergency contacts and emergency detection preferences.
- Selected among the Top 20 projects out of 100+ entries at a project competition conducted by KPR College of Engineering.

Water Quality Monitoring System

- Developed an IoT-based water quality monitoring system using ESP32.
- Monitored water quality parameters in real time.
- Implemented automated SMS alerts whenever unsafe water conditions were detected.
- Designed a practical solution for real-time water quality monitoring and early warning.

Beverage Sales Data Visualization Dashboard

- Beverage Sales Data Visualization Dashboard
- Built interactive dashboards using Power BI and Tableau.
- Analyzed beverage sales data to identify trends and business insights.
- Presented business data using clear and meaningful visualizations.

CODING PROFILE

LeetCode

- Solved 500+ coding problems primarily using Java.
- Maintained a 130+ day coding streak through consistent daily practice.
- Regularly practice Data Structures & Algorithms and SQL problems to strengthen problem-solving skills.

EDUCATION

B.E. CSE (IoT) – K.L.N College of Engineering

CGPA: 8.68 / 10

Class XII: 83% | Class XI: 88%

Expected Graduation: 2027

CERTIFICATIONS

- Spring Boot Development Internship Certificate
- Internship Completion Certificate – Full-Stack Travel Management System
- Python Programming Certification
- Data Visualization using Power BI & Tableau
- Web Development Certification (HTML, CSS, JavaScript)
- Project Participation Certificate – KPR College of Engineering (SafeShadow)
- Project Participation Certificate – Karpagam College of Engineering (Water Quality Monitoring System)
